promote the prosperity of any individual or  
company, shall be considered as advertisements and  
charged accordingly.

No contract made for a long period unless  
advance payment is made. Shorter duration  
will be charged in proportion.

Advertisements inserted until notified.  
A daily paper except Monday. A daily  
except Monday.

**OUR WEATHER.**

Our recent mails have brought us  
accounts of severe weather throughout  
all parts of Ontario. Snow piling  
up to fearful depths and blowing  
and drifting, so as to cause complete  
blockades, not only on the railroads,  
but also so as to render the country  
roads next to impassable, and our  
eastern friends are quite anxious  
about our comforts away out in what  
they term the "cold country." To  
set their minds at rest on this matter  
we may state that the residents of  
Calgary and vicinity have the  
finest winter climate of the whole of  
the North American continent, if we  
except those parts which are known  
as southern latitudes. If all our  
cold days were picked out we could  
not count up enough to make two  
weeks of ordinary winter weather in  
Ontario. With the exception of the  
few cold days when the mercury  
but once ran down to 27°. The  
thermometer has scarcely ever de-  
scended as low as 10°, while the  
average during the day time has  
been from 30° to 40° above, with  
the nights about 20° above. We  
have not had at any time more than  
two inches of snow, while generally  
speaking the ground is not covered,  
nor have we had any wind to make  
things unpleasant. On one or two  
occasions we had a stiff gale for  
about half an hour at a time, mostly  
chinnooks, but for the most part  
nothing to make either walking or  
driving unpleasant. We would say  
to our friends who find the long  
winters of Manitoba, Ontario and  
other parts of the Dominion so trying  
to their constitutions that no pleas-  
ure or healthier winter resort can  
be found on the whole continent,  
and we are very much mistaken if  
Calgary does not yet become a  
resort for those who require a  
mild winter climate.

**L. & D. SOCIETY**

The last meeting of the L. & D.  
Society was a particularly interesting  
one, and the debate called forth some  
very good speeches; the debaters on  
each side entering with a great deal  
of zeal and vigor into the merits of  
the respective merits of his side.  
The question was "Resolved, That  
Calgary has better natural advan-  
tages than any other place in the  
N.W. Territories." The affirma-  
tive was supported by Messrs. Fitz-  
gerald, McKelvie, Bannerman, Hud-  
son and Moore, while Messrs. Lind-  
say, Kelly, Bowen and Chisholm  
urged the negative. The President,  
in summing up the points advanced  
by each side, declared in favor of the  
affirmative.

The next meeting will be held on  
Friday evening this week when the  
following will be debated. "Re-  
solved, That small farming is of  
more advantage to this vicinity than  
large farming or ranching." All  
members are urged to be present.

**AS OTHERS SEE US.**

The Winnipeg Sun says: "The  
Canadian Pacific Railway has re-  
served for themselves a much larger  
place at Calgary than at any other  
place along the line. This may seem  
strange, as it is not to be a 'division  
town.' It is owing to the fact that  
at this point the trains will have to

"break bulk," as here the grade be-  
gins. Consequently Calgary will be  
quite an important railway town  
after all. A fine brick station, in  
accordance with the requirements  
of a town of some importance, will be  
erected, and in other ways the com-  
pany will give the town assistance.  
Already their surveyors have laid out  
a beautiful park on Sand Lake, and  
near by a company is erecting a  
large summer hotel. The city is  
very advantageously situated for  
the construction of water works, the  
Elbow being scarcely half a mile  
directly south from the station.  
Already a company have the matter  
of a water supply in hand.

**THE HOME STAKE MINING COMPANY.**  
SILVER CITY, N. W. T.

Capital—One Hundred Thousand  
Dollars in Ten Thousand Shares  
of Ten Dollars Each.

**PROVINCIAL DIRECTORS:**  
B. E. Spence, Mill Owner, Winnipeg;  
John Ellis, General Merchant, Silver  
City.

James M. Grew, Hotel Keeper, Silver  
City.

James Deacon (Messrs. S. J. Hogg  
& Co.), Lumber Merchant, Silver  
City.

Patrick McAfee, Mining Manager,  
Queen of the Hills Co., Silver  
City.

Thomas Tretheway, Miner, Silver  
City.

S. J. Hogg, Lumber Merchant, Cal-  
gary.

Herbert J. Low, General Merchant,  
Silver City.

A. Dewar, Storekeeper, Silver City.  
A. Stewart, Storekeeper, Silver City.  
Bakers—Messrs. I. G. Baker & Co.,  
Calgary.

Legal Manager—Robert Patton.  
Mining Manager—J. Davidson.

This Company has been formed for the  
purpose of working twenty acres of rich  
mineral land, in the new famous Silver  
City district of the Rocky Mountains.  
The claim is a continuation northward  
of the Alberta Mining Company's property.  
That Company at the present time is en-  
gaged in driving a tunnel through solid  
rock in a height of 10,000 feet in  
width, and it is expected they will shortly  
reach the old, defined side cropping out  
on the surface.

The discovery of this lode was Mr.  
Joseph Hogg, who for many years past  
has been prospecting for silver and gold  
in the Rocky Mountains, and, although at  
various times he found well defined lodes,  
he considered the one at Silver City far  
superior and he has now with.

Practical miners who have had long  
experience in Cornwall, England; Lead-  
ville, Nevada; and California, have care-  
fully examined the Home Stake Mining  
Company's property, and they are unani-  
mous in their opinion as to the richness  
of the ore, and they also state that few,  
if any, of the localities mentioned, surpass  
this mineral wealth.

The Directors have secured the ser-  
vices of Mr. J. Davidson as mining  
manager, and consider that the Company may  
be congratulated on their having done so,  
as few miners have had more practical  
experience than he, in mineral workings.  
Under his able supervision the work will be  
pushed on with all rapidity, by three  
shifts of miners every 24 hours.

Two independent assays have been  
made of the ore cropping out on the cap of  
the lode with excellent satisfactory results.  
The chief reason which actuated the  
Directors in the Home Stake Mining Com-  
pany, was that a smelting plant would  
very shortly be required, and to  
place this on the ground would require a  
greater amount of capital than they could  
command. The estimated cost of the  
plant erected on the ground is \$150,000.  
It is more than probable that the smelter  
can be kept fully employed by the Com-  
pany, but should fail to be the case, as  
it will be without cessation, arrange-  
ments might be made to treat ore for  
other claim holders at a per centage on  
the net yield, or as may be arranged.

To meet this outlay the Directors pro-  
pose to issue five shares at \$1.00 each on  
application, and to make no further call for  
the balance, unless at some future time it  
may be deemed advisable to do so, such  
as the acquiring other properties for  
purchase, or like profitable undertaking.  
Plentiful, so that the most costly line  
of smelting operations will be reduced to  
a minimum.

Access to the mine is unusually easy,  
and its short distance from the C.P.R.  
line of road offers all the facilities which  
could be desired in cheap transit of metal  
for refining purposes.

In offering shares to the public the Di-  
rectors have no hesitation in stating that  
at no distant date large returns will re-  
sult from the investment.

A large number of shares were applied  
for immediately on its becoming known  
that it was the intention of the Directors  
to offer it to the public. Interested pur-  
chasers would therefore do well to make  
their applications for allotment shares be-  
fore a greater number of shares be  
applied for than are at the disposal of the  
Directors, they will be allotted pro rata.

To the Directors of the Home Stake Min-  
ing Company, N. W. T.

Gentlemen—I hereby make application for  
— shares in your Company. I enclose  
— being \$1.00 deposited on each  
share, and I agree to accept this or any  
other sum of shares which you may de-  
termine to issue.

Yours faithfully,  
Name,  
Address,  
Date.

JAS. EDWARD, Secretary.

Guaranteed.

#### MIXED FARMING.

Numerous correspondents are continuously enquiring about farming lands, and the amount of capital required, in the vicinity of Calgary. To these we would say that we have room for hundreds of practical farmers, who can bring with them capital from \$2000 to \$15,000, and we believe in no part of the world can a better investment for the same amount be found. There is yet a considerable quantity of land for homesteading and pre-emption, and as no doubt the Government will extend their good action by throwing open the mile belt west of the 4th initial meridian, a still greater quantity will be opened up. Besides this, the lands of the C. P. R. and the B. C. Co. are now in the market on reasonable terms, and any person with the amount of capital mentioned, can have a first-class farm, at once. The advantages presented by this part of the country for the small farmers are very numerous and may in part be enumerated as follows: The quality of the soil is pronounced upon by the land examiners, is excellent by none in the whole North West, and actual experience has proved that grain of very superior quality matures perfectly, and rewards the husbandman with an abundant yield, as evidenced by the following figures: Wheat thirty bushels per acre, barley from thirty to thirty-five bushels, and oats as high as sixty bushels per acre. But were grain-raising the only, or even the chief source of wealth to be derived from such investment, we should be much more cautious in our advice to intending emigrants, but as our plains are covered with the sweetest and most nutritious of grasses, and watered by the purest water in the world, a fortune awaits the farmer who will stock his ranch with cows, and carry on dairy farming. As we mentioned before, the superior advantages of the country will insure large productions, while the cost of the maintenance of the animals, is lower than can be procured in any other part of the Dominion. In proof of what we say, we have only to cite facts which are every day transpiring before our eyes. On arriving in this country last summer, we witnessed with considerable incredulity to the tales which were told us about cattle and horses remaining all winter, and procuring their own food, but we did not realize the reality exceeds anything we had ever anticipated. We find that cattle and horses have not only remained all winter, but they are in as good condition as the best stall-fed cattle of Ontario, and from this we infer that farmers who can stock their farms with from twenty to two hundred cattle, will realize large profits from the butter and cheese which they can manufacture, as from the number of men employed in the mines, and other industries, a large supply will always be required to meet the demand, and as freight rates will always be high, producers can at all times depend on high prices. The raising of sheep, pigs and poultry, offer equally as great, if not greater advantages for the investment of a limited amount of capital, as any we have mentioned, and we have no doubt the English and Scotch farmers, who are to emigrate to this country in the spring, will become rich in a few short years.

#### THE GOVERNOR'S VISIT.

The train from the east last Wednesday, brought in His Honor Lieut. Governor Dewdney, on an official tour throughout this part of the territories. He took up his quarters while in Calgary, at the barracks. On Thursday, the Civic Committee, in pursuance with motion passed at a former meeting, asked His Honor for an interview, which was accorded them in the Orderly Room, at 11:30 a.m., when Messrs. Walker, Swan, King, Moulton and

Murdoch, drew his attention to the following question of importance in the interests of the place, viz: bridges, incorporation, schools, and representation to the North West Council. The committee represented to him that the grant of \$300 to the Elbow bridge was too small and asked to have it increased, but His Honor explained that the total grant for bridges throughout the territories was but \$7000, most of which had been expended, and that it was generally understood that this money was not to be granted for towns, but on country roads, but he explained that as a revenue had been derived from the 50 cents per gallon tax on permit liquor, that the grant of \$500 had been made, which he increased to \$500. With regard to incorporation he said it was only necessary to have the census taken, and if it were found we had 300 or more adult males, incorporation would be granted on the basis of two-thirds of the population. The school question, he said, rested with the people themselves, as if they saw fit to engage a teacher at a salary not exceeding \$800, the Council would pay half providing the attendance reached 15. Concerning representation, he explained that the proclamation would be issued in time before the next meeting of the Council, proclaiming this an electoral division, but as the Dominion Government were likely to make some changes in the laws regarding the Territories, at its present sitting, he considered it wiser not to issue the proclamation at once. The remainder of the day was spent by the Governor in doing the town, calling upon old friends, of course not forgetting the Herald. On Thursday he started for Medicine Hat, leaving the different streams on the route requiring bridging. He is expected back to-day or to-morrow.

#### CIVIC COMMITTEE.

A special meeting of the Committee was called for last Thursday evening at the Royal Hotel, at 8 o'clock. All the members were present excepting Dr. Henderson, who was unavoidably absent from town. Major Walker presided, and explained that he had called this meeting to consider the advisability of making application for incorporation as a town. On motion, it was resolved that the census be taken, and a petition be circulated for signatures of those desiring incorporation. The boundaries of the town were then defined to be those portions of sections 12, 13, 14, 15 and 16, south of the Bow River, together with the north halves of sections 10 and 11, in all about 2500 acres. It was further Resolved, That Messrs. Swan and Moulton be appointed as census-takers on the west, and Walker and Stewart be appointed in the same capacity on the east side of the Elbow, the whole work to be completed before the return of the Lieut.-Governor from Macleod. The question of a public school was next taken up, when it was resolved to call a public meeting of the people, in the Open House, for next Thursday evening, that the voice of the public may be obtained on so important a matter. A letter was then read from Capt. Stewart, agent for the Denny Estate, donating either the grant set aside for school purposes, or laid out on their map, or any other unsold lots the Committee might select. On motion, the communication was read, and in it he presented to the meeting on Thursday night. The meeting was then adjourned.

#### PASSENGERS SHAKEN UP.

At Trenton, Jan. 17th, the Grand Trunk express from the west was derailed by the spreading of a switch last night. The train was unusually large, containing Members of Parliament and others on their way to Ottawa. The engine, six passengers and two Pullman cars left the train. All were badly derailed and the passengers were injured, but fortunately no one was killed. Traffic was delayed several hours.

DENTON & MARTIN.  
CARPENTERS, BUILDERS AND PAINTERS.  
East side of Elbow, CALGARY, N. W. T.

Mortimer & Co  
VIENNA  
Bread and Biscuits Manufacturers

Have fitted up and now have in full operation a new plant, adapted especially for the manufacture of Vienna and High Class Bread and Biscuits.

The principal advantage derived from this oven is the bread while baking is kept in constant motion by means of a belt, which removes the bread round a centre, in such a manner as to keep the crust uniform. The motion keeps the steam and hot air in circulation, which operates for itself and the bread, being constantly pure and free from all deleterious gas or foreign substances, which makes it very easily digested, all the nutritious substances being retained.

TUFFET'S PATENT MACHINERY for the manufacture of RELIABLE WATERERS.

The operation of Tuffet's Patent is sufficient recommendation that all drains constructed by means of this system for the sanitary daily and weekly flow, which may be had of an agent.
